PROJECTS

Invoice Tool

- Easiest invoicing application for **freelancers and small businesses**.
- Users can create an **invoice** for customers and all the information will be displayed on the user dashboard. And also users can **download and update the invoice and payment status**.
- Link : <https://arc-invoice-tool.vercel.app/>

Fakestore API

- Tech Stack: ReactJs, NodeJs, Express, MongoDB (MERN)
- FakeStoreApi is a free online **REST API** that you can use whenever you need **Pseudo-real data** for your e-commerce or shopping website without running any **server-side code**.
- Link : <https://fakestores.herokuapp.com/>

Semper Blinds

- Tech Stack: ReactJs, TailwindCSS
- This is my client's **freelance project**. This website is designed for customers to get all the information about the business and the **quotation tool** is also available for the customers.
- Their business grew by **20%** using the website
- Link : <https://semperblinds.com/>

Expense Tracker

- Tech Stack: ReactJs, Firebase, TailwindCSS
- Build an Expense Tracker Application to track my freelance client's daily needs.
- This project has **3 sections** Personal, Business, and Room rental status. This project also has **user authentication**.
- An expense tracker is a platform where my client can list all his **income and expenditures** to analyze his money. So he can have any idea where he is spending his amount.
- Link : <https://all-expense-tracker.vercel.app/>

TRAINING

Zensar Technologies Training

Mysql, Softskills., Java and java unit testing, Adv Java.
